Education

University of Michigan - Dearborn, MI   **April 2017**

Bachelor of Science in Computer and Information Science   **3.88 GPA**

- Majored in Computer Science

Skills

- Fluent in Java and Python

- Prior/Partial experience with Javascript, Typescript, C++, C#, and SQL

- DevOps skills in Vagrant, Gradle, Flyway, and Jenkins

- Extensive version control experience with Git

Experience

Software Engineer in the Ford College Graduate Program at Ford Motor Company   **June 2017 – Present**

- Worked on two product based teams utilizing the Spring and Angular frameworks   **Dearborn, MI**

- Lead technical interviews for our teams that resulted in three hires

- Retooled our team's dev review process that resulted in a decrease in defects

- Created Framework for our pairing stations that installs all needed software and dotfiles

- Worked on company-wide solution to provide consistent development environments using Vagrant

Co-op DevOps Architect at Oplogic   **January 2016 – February 2017**

- Implemented Gradle as company's first ever build tool   **Clawson, MI**

- Virtualized development environments with Vagrant

- Migrated version control system from CVS to Git

- Wrote numerous Python and Bash scripts to automate production moves and DevOps tasks

- Increased productivity by creating local databases to decouple development environments

- Put database schema in version control with a migration based approach using Flyway

- Introduced continuous integration and deployment with Jenkins

Personal Project

PoshPlus   **May 2018 – Present**

- Created an open source PowerShell framework that greatly improves the terminal experience on windows

- Provides over 100 git aliases with a function to help discover them

- Includes beautiful themes such as the famous Agnoster theme

- Abstracts the provided package manager to allow users to install any software for fast and easy setup

- Includes command history search with partially typed commands
